

Git & Resume: Career Acceleration Program

PROGRAM OVERVIEW

Duration: 8 Weeks | Certification: Govt. MSME Recognized | Mode: Hands-On Live Mentorship
Master version control, GitHub team workflows, ATS resume optimization, and corporate interview prep.

DETAILED 8-WEEK CURRICULUM

Week 1: Git Foundations & Local Repositories

Version control concepts, Git installation, init, staging area, commits, logs, and diff.

Week 2: GitHub & Remote Collaboration

SSH/HTTPS authentication, remote repositories, push, pull, fetch, and repository settings.

Week 3: Branching Strategies & Isolation

Feature branching, Git branch lifecycle, HEAD management, and standard Git Flow workflows.

Week 4: Pull Requests & Merge Conflicts

Code reviews, pull request workflows, merge strategies, and resolving merge conflicts.

Week 5: Advanced Git Mastery

Git stash, interactive rebasing, cherry-picking, reset vs revert, and gitignore best practices.

Week 6: ATS-Optimized Technical Resume

Resume structure for software developers, keyword optimization, project descriptions, and metrics.

Week 7: LinkedIn Profile & GitHub Portfolio

LinkedIn branding, technical headline optimization, README portfolio showcases, and open-source.

Week 8: Mock Interviews & Placement Strategy

Live behavioral & technical mock interviews, salary negotiation tactics, and job application pipelines.
